Professional Summary

Computer Engineering student with strong foundations in Java, Object-Oriented Programming, Data Structures and Algorithms, and full-stack development. Experienced in building AI-powered applications, REST APIs, database-driven systems, and secure backend services using Java, Spring Boot, PostgreSQL, Next.js, and Docker. Hands-on experience with LLM integration, RAG pipelines, authentication, CI/CD, and computer vision applications.

Education

St. Aloysius English Medium School, Yavatmal <i>Central Board of Secondary Education (SSC: 99.2)</i>	2020-21
Raj Junior College, Yavatmal <i>Maharashtra State Board (HSC: 76.17)</i>	2022-23
Savitri Bai Phule Pune University, Pune <i>Bachelor of Engineering in Computer Engineering (CGPA: 9.62 / 10)</i>	Expected 2027

Skills

Languages: Java, C++, JavaScript, Python
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming(OOP), DBMS, Problem Solving, Authentication
Frameworks and Technologies: Spring Boot, Spring MVC, React.js, Next.js, Node.js, Express.js, REST APIs, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, Supabase
AI/ML: LLM Integration, Ollama, RAG, CLIP, DensePose, Gemini API
Tools/ Platforms: Git, GitHub, Docker, Maven, GitHub Actions, VS Code, Cursor, Figma, Canva

Projects

AI Agent Swarm — Autonomous Software Engineer <i>Java, Spring Boot, PostgreSQL, Next.js, Docker, Gemini API, CI/CD, GitHub</i> Link - Developed a multi-agent AI system with Planner, Coder, Tester, and Reviewer agents orchestrated through Spring Boot to automate software development workflows. - Built a Next.js dashboard and integrated Gemini API for code generation, automated testing, and code review workflows. - Containerized the application using Docker Compose and configured GitHub Actions CI/CD for automated builds and testing.
AI SQL Generator <i>Java, Spring Boot, PostgreSQL, Spring Security, Next.js, Ollama, Docker, GitHub</i> Link - Developed an AI-powered developer tool that converts natural-language requirements into schema-aware SQL queries using Ollama and Qwen2.5-Coder. - Built REST APIs with Spring Boot, JDBC/JdbcTemplate, and PostgreSQL system metadata to dynamically retrieve database schema information for SQL generation. - Implemented SQL and input validation to detect invalid tables and columns and restrict unsafe generated queries, with JWT-based authentication and user-specific query history.
Multimodal RAG <i>Python, PyMuPDF, CLIP, ChromaDB, Gemini, Streamlit, Live Demo, GitHub</i> Link - Developed a multimodal Retrieval-Augmented Generation system that extracts and indexes text and images from PDF documents for context-aware question answering. - Used PyMuPDF for PDF parsing, CLIP for shared text-image embeddings, and ChromaDB for vector similarity search and top-k retrieval. - Integrated Google Gemini to generate responses from retrieved textual and visual context and deployed the application using Streamlit.
DensePose Human Body Surface Mapper <i>Python, OpenCV, Detectron2, DensePose, FastAPI, Docker, GitHub</i> Link - Developed a DensePose-based human body surface mapping application using Python, OpenCV, Detectron2, and FastAPI. - Generated IUUV maps, 24-patch body-part segmentation, visual overlays, and automated body-region analysis. - Built a Next.js frontend, containerized the application with Docker, and implemented GitHub Actions CI/CD for automated builds and testing.

Experience

Web Development Intern – Vault of Codes

Oct 2025 – Nov 2025

Remote - Pune

[Certificate](#)

- Developed responsive web application components and integrated frontend workflows with backend APIs.
- Debugged application issues and optimized UI functionality while working in a collaborative development environment.

UI/UX Design Intern – Smaran.ai

Oct 2025 – Nov 2025

Remote - Pune

[Certificate](#)

- Designed the company's website and an educational quiz application using wireframes, user flows, and interactive prototypes.
- Collaborated with the team to improve usability, consistency, and clarity across application workflows.

Full Stack Development Intern – Coding Savvy (NextEra Code)

Jan 2026 – Feb 2026

Remote - Pune

[Certificate](#)

- Developed frontend and backend functionality for a production-oriented nurse staffing management application using Next.js, Supabase, REST APIs, and PostgreSQL.
- Implemented database operations, authentication workflows, and business-rule validations for nurse scheduling and assignment workflows.
- Collaborated with a development team to integrate APIs, debug application issues, and deliver functional features.

Certificates/Achievements

- NPTEL Certification – Data Structures and Algorithms in Java – Score: 57/100. [Link](#)
- Solved 175+ DSA problems on LeetCode. [Link](#)
